Counteract long term antibiotic use with Biodophilus. Antibiotics can destroy the beneficial bacteria in the body, allowing pathogenic organisms to flourish. L. acidophilus is used to treat urogenital and gastrointestinal infections. Biodophilus can restore the beneficial bacteria to the digestive system.

Biodophilus is a freeze dried culture of Lactobacillus Acidophilus and Lactobacillus Bifidus in a dietetically milk-free base, containing 1.25 billion colonies per serving. Biodophilus is available in capsules and powder.

Biodophilus Powder is very effective with children because it mixes very nicely in water and it tastes good because of the FOS component.

The Lactobacillus Acidophilus and Lactobacillus Bifidus bacteria are a dominant group of bacteria within a healthy gastrointestinal tract. Lactobacillus are a lactic acid bacteria meaning that they have the ability to transform sugar to lactic acid. The formation of this acid is one of the ways that the Lactobacillus bacteria inhibit the growth of pathogens such as E.Coli and candida albicans. They assist in the digestion process, absorption of nutrients, synthesis of certain vitamins, bowel function, detoxification and elimination of pathogenic organisms. Any upset in the balance of the microflora can lead to digestive problems such as bloating, gas, constipation, malabsorption of nutrients, deficiency of certain B Vitamins and Vitamin K. It can also lead to an overgrowth of pathogens such as candida and an increase in blood toxins, such as ammonia, which can put a strain on liver function.

Recommended for
- People who have taken a course of antibiotics
- Women who take oral contraceptives
- People travelling to exotic locations
- Those who suffer from irritable bowel syndrome or similar conditions
- People with candidiasis

Reestablishment of correct bowel flora
Use Biodophilus with any condition requiring the reestablishment of correct bowel flora, i.e., parasites, fungal/yeast overgrowth, gastric inflammation, antibiotic therapy, constipation, or diarrhea.

**Daily Value not established.**
Biodophilus supplies bacteria needed for intestinal health
It contains Lactobacillus Acidophilus and Lactobacillus Bifidus bacterium, two types of bacteria that are found occurring naturally and in abundance (more than 80%) within the microenvironment of the gastrointestinal tract and are known to be health promoting. The formulation is non-dairy and is suitable for those allergic to milk products.

Biodophilus contains Vitamins C and E and is packaged in nitrogen to prevent oxidation and destruction of the bacteria.

Processing
On-site laboratories are constantly monitored and tested by expert chemists and microbiologists to ensure consistent quality of raw materials, product batches, and finished products.

Vitamin and mineral analyses are conducted to validate the product content and specifications, assuring high quality.

FDA Drug Manufacturing Standards
MBi Nutraceuticals operates its own FDA licensed Drug Manufacturing facility. Our standard operating procedures are based on “Current Good Manufacturing Practices” as defined by the Food and Drug Administration. MBi ensures the highest quality nutraceuticals by applying our drug manufacturing procedures to every nutritional, herbal, food, homeopathic, and personal care product we make.

No Additives
This product contains no sugar, starch, salt, or preservatives, and no wheat, yeast, or milk derivatives.

Synergistic MBi Products
Bio-Naturalvite
Black Walnut
Verminal Drops
Gastrotox
