Turn to nature for detoxification with Livachol, an all-natural liver detoxifier. Livachol utilizes the natural detoxifying properties of milk thistle, watercress, beets, and parsley. These ingredients, along with choline bitartrate, inositol, and betaine HCl, help the body detoxify substances in the liver, and help support the liver itself. Livachol helps the liver do its job, and at the same time replenishes and strengthens it.

The most simple and effective way to cleanse the blood stream and take the load off the immune system is to improve liver function. The easiest way to improve liver function is to reduce the load of toxins introduced to the body, and to detoxify the overused liver. This special blend of plant extracts, vitamins, minerals, and herbs is just what is needed to improve the function and health of the overworked liver.

**Brings Balance**

**Choline Bitartrate** helps the body make several important compounds necessary for healthy membranes. It also helps the body produce lipotropic agents, which convert fats into useful products, and produce HDL (good cholesterol).

**Inositol**, part of the vitamin B-complex, plays an important role in the health of cell membranes, which regulate the contents of cells and help them function effectively. Inositol also affects nerve transmission, and helps the body transport fats.

**Betaine Hydrochloride (Betaine HCl)** helps the body digest food by converting pepsinogen to pepsin, an enzyme that breaks down protein. It is especially helpful in cases where the stomach does not secrete sufficient hydrochloric acid due to age, stress, or other lifestyle factors.

**Milk Thistle**, an antioxidant more potent than vitamin C or vitamin E, rejuvenates the liver and helps keep it healthy and strong. It protects the liver cells from chemical damage, and contains a natural compound called silymarin, which nourishes the liver unlike any other known nutrient.

**Watercress** is full of vitamins, minerals, nutrients, and antioxidants, including vitamin C, vitamin A, beta-carotene, folic acid, iodine, iron, protein, and calcium.

**Beets** help normalize the pH of the body and nourish the blood. Beet leaves contain beta-carotene, and other carotenoids, which function as antioxidants.

**Parsley** is a natural diuretic, and has been used since ancient times to treat gastrointestinal disorders. The leaf contains essential oils, glycoside, magnesium, calcium, beta-carotene, flavonoids, vitamin K, and a large amount of vitamin C. It also contains chlorophyll, which has been shown to be important to healthy digestion.
Livachol is a combination product
It contains the right ingredients in the right amounts to detoxify the liver. This special blend of plant extracts, vitamins, minerals, and herbs is just what you need to improve the function and health of the overworked liver.

Livachol works to detoxify the liver by combining ingredients known to aid in the detoxification of substances in the liver as well as nutrients to support the liver itself. Livachol helps the liver do its job at the same time it replenishes and strengthens it. Ingredients such as choline bitartrate, inositol, betaine HCl, milk thistle, watercress, beets, and parsley combine to create a complete liver health supplement.

Processing
On-site laboratories are constantly monitored and tested by expert chemists and microbiologists to ensure consistent quality of raw materials, product batches, and finished products.

Vitamin and mineral analyses are conducted to validate Livachol content and specifications, assuring high quality.

FDA Drug Manufacturing Standards
MBi Nutraceuticals operates its own FDA licensed Drug Manufacturing facility. Our standard operating procedures are based on “Current Good Manufacturing Practices” as defined by the Food and Drug Administration. MBi ensures the highest quality nutraceuticals by applying our drug manufacturing procedures to every nutritional, herbal, food, homeopathic, and personal care product we make.

No Additives
This product contains no sugar, starch, salt, or preservatives, and no wheat, yeast, or milk derivatives.
