Neuron Complex supports brain function in this special formulation of vitamins, minerals, and brain tissue. Neuron Complex supplements the body with the nutrients and hormones that the brain needs for proper and effective functioning. Neuron Complex also supplies the body with the nutrients needed to maintain healthy tissues throughout the body.

Neuron Complex is prepared to help nervous dysfunctions of the body. The nervous and muscular systems are aided by the vitamins and herbs. Neuron Complex helps with the protein synthesis of RNA and DNA. The combination in this complex helps with vitamin C, calcium, and glucose metabolism, acid/alkaline and electrolyte balance, phosphorylation and normal brain function.

**Brings Balance**

**Brain tissue** is a rich source of nutrients, enzymes and other factors that support specific gland-related metabolism and physiological function. Glandular supplementation provides supplementation like no other combinations that help in tonifying specific organ tissues by providing the specific glandular nutrient combinations and the necessary enzymes for proper cellular health found only in glandulars.

**Thiamine** is involved in the energy stimuli of neural tissue and in the proper growth of muscles, organ tissue, and neural tissue. It is essential for good muscle tone, nerves, functioning of the digestive system, hair, skin, eyes, and liver. It is also essential in the metabolism of carbohydrates in the body’s conversion into glucose. It is also important for the normal function of the muscles and heart, growth, fertility, and lactation.

**Niacinamide** is imperative for nerve functioning and high blood pressure. Niacinamide is a capillary dilator of the brain and other tissue, aids neural brain transmitters, and is one of the missing Vitamin B’s in the brain that causes the flashing lights to appear in a migraine headache. Niacin converts tryptophan, an amino acid that helps stabilize the neurotransmitters in the brain for brain health and function. It also works with vitamins B2, B1, and B6 for brain health.

**Magnesium** is essential for the normal contraction of muscles and the nervous system as it works with calcium, phosphorus, sodium, and vitamins B, C, and E. It also is necessary for the acid/alkaline balance in the body, and for electrolyte balance. It is imperative in the intracellular basic energy.

**Valerian** restores, stimulates, relaxes, and decongests the heart, arterial circulation, nerves, brain, spine, and lungs.

**Passiflora** is used as a mild sedative and as a supportive adjunct with other herbs.

Support brain function with Neuron Complex
This special formulation of vitamins, minerals, and brain tissue supplement the body with the nutrients and hormones that the brain needs for proper and effective functioning. Neuron Complex also supplies the body with the nutrients needed to maintain healthy tissues throughout the body.

Processing
On-site laboratories are constantly monitored and tested by expert chemists and microbiologists to ensure consistent quality of raw materials, product batches, and finished products. Analyses are conducted to validate content and specifications, assuring high quality.

No Additives
This product contains no sugar, starch, salt, preservatives, artificial colors, flavors or additives, and no corn, wheat, yeast, soy, or milk derivatives.

FDA Drug Manufacturing Standards
MBi Nutraceuticals operates its own FDA licensed Drug Manufacturing facility. Our standard operating procedures are based on “Current Good Manufacturing Practices” as defined by the Food and Drug Administration. MBi ensures the highest quality nutraceuticals by applying our drug manufacturing procedures to every nutritional, herbal, food, homeopathic, and personal care product we make.
