Renewal Moisturizing Cream is the day-wear component of the Renewal lineup. Skin renewal doesn’t have to happen at night. Smooth on alone or under makeup for all day moisturization and repair. Renewal Moisturizing Cream is a blend of Vitamin A, Ascorbyl DMAE, and herbs critical to optimum skin health, in a rich moisturizing cream. It helps skin look firmer, reducing the appearance of lines and wrinkles. It also smoothes out the appearance of crow’s feet and promotes healthier, younger looking skin.

Beneficial ingredients in Renewal Moisturizing Cream

**Jojoba Oil**, is considered a “natural moisturizing factor”. Just like the lipids that are naturally found in your skin, it helps fight surface roughness, flaking, and fine lines. Due to the unique molecular structure of jojoba oil, not only will it mix readily with the skin’s natural oils, but can even inhibit the growth of certain types of bacteria associated with acne.

**Vitamin E** is an antioxidant and promotes the growth of new cells. Vitamin E prevents the destruction of the lipid part of the cell membranes. Other benefits include healing of damaged skin. Vitamin E also preserves the potency of the other nutrients in the lotion.

**Vitamin A** reduces wrinkles by working to repair DNA in individual cells. Vitamin A is an antioxidant and promotes the growth of new cells.

**Ascorbyl DMAE** (Dimethylaminoethanol) is a natural surfactant harvested from fish and complexed with Vitamin C. Vitamin C works well to reduce the signs of aging, but when combined with DMAE in our proprietary formula it works even better. It functions to strengthen, smooth, and elasticize tissues and transport nutrients to the cells. It also helps the skin to retain moisture, further reducing fine lines. This complex is amphoteric. It can act as an antioxidant in both the aqueous (watery) parts of cells and the lipid (fatty) parts of cells. This is very important because all cells are surrounded with a lipid membrane which if destroyed causes the destruction of the entire cell.

**MSM** (methylsulfonylmethane) Like DMAE is a natural component of all cells. It helps the skin to retain moisture, further reducing fine lines. MSM also scavenges free radical oxygen to prevent damage to healthy skin.

**Alpha Lipoic Acid** Is another antioxidant. It helps the body use Vitamin C as ascorbic acid in collagen synthesis. It also works with panthenol in the synthesis of skin amino acids and other skin components. Collagen, the major protein in skin and joints, keeps the skin tight and supple and the joints healthy.

**Polyphenols** are catechins derived from green tea extracts. Catechins trap free radicals that damage the skin up to three times better than Vitamin C. Catechins also retard the growth of harmful bacteria in the skin.

**Copper** Is an essential mineral which complexes with the important skin protein called elastin. Elastin keeps skin tight and supple. When copper is depleted the skin becomes brittle and loses its elasticity.
Renewal Moisturizing Cream contains nutrients that are delivered directly to the cells, reducing fine lines and wrinkles

Renewal Moisturizing Cream contains ingredients now widely recognized to visibly reduce fine lines, wrinkles, and other signs of aging, including dryness. This cream lessens the appearance of age spots, pore size, and discoloration, creating a balanced, even skin tone. It also helps the skin look firmer, improves elasticity, boosts skin hydration level, and helps combat environmental stress.

Processing

On-site laboratories are constantly monitored and tested by expert chemists and microbiologists to ensure consistent quality of raw materials, product batches, and finished products. Analyses are conducted to validate content and specifications, assuring high quality.

FDA Drug Manufacturing Standards

MBi Nutraceuticals operates its own FDA licensed Drug Manufacturing facility. Our standard operating procedures are based on “Current Good Manufacturing Practices” as defined by the Food and Drug Administration. MBi ensures the highest quality nutraceuticals by applying our drug manufacturing procedures to every nutritional, herbal, food, homeopathic, and personal care product we make.

Synergistic MBi Products

Facial Cleanser
Facial Toner
Renewal C Plus
Renewal Eye Cream
Renewal A & E Lotions
