Too Much Sun! Spray is simply the best remedy for burn and sunburn pain! Too Much Sun! contains a balance of Homeopathic ingredients, vitamins and minerals including zinc and copper peptides, alpha-lipoic acid, Vitamin E, MSM and the trace mineral power of Trona. The specialized formula provides nutrients crucial to optimum skin health. This fast acting spray soothes sunburn (and burn) pain, smooths the skin, promotes healing, mitigates peeling and itching, increases radiance, and promotes the appearance of healthier, younger looking skin.

The skin is the body’s largest organ and is the number one defense against germs. It is important to maintain the skin’s moisture to prevent skin breakdown, particularly after sustained exposure to sunlight. When the skin breaks down, bacteria and viruses can more easily enter the body. Most people are not even aware that microscopic lesions in the skin allow germs to enter the system. Good hygiene and Too Much Sun! help maintain the largest organ and defend the body.

Brings Balance

Keeping skin healthy
We live an active lifestyle and get exposed to excess sunlight if we spend any time outdoors. This may cause sunburn which results in red, painful, overheated skin. Too Much Sun! cools the skin almost immediately making you more comfortable and less red. Tanning booths may also burn the skin if used to excess. Our spray works the same way on tanning burns. Construction and metal workers, including roofers, welders, landscapers, and carpenters work in an environment which puts severe stress on the skin due to heat, metal fumes, caustic chemicals and UV radiation from arc welders and the sun. Combat these elements by minimizing exposure to environmental elements, and give the skin the protection and nutrients it needs. Nutrients such as E, Aloe Vera and Lipoic acid can help protect the skin from free-radical damage and provide cell nourishment. MBi Nutraceuticals’ Sunburn Skin Spray gives skin the moisture and nourishment it needs to look and feel healthy.

Highlights of a few of the beneficial ingredients in Sunburn Skin Spray

Aesculus Hipp is extract from Horse chestnuts. It’s main function is to improve circulation and improve aching and soreness in limbs and extremities.

Aloe Vera jelly is the extract from the aloe plant. It has been used for centuries all over the world as the first defence in healing burned skin. It reduces redness and promotes circulation to troubled areas of the skin.

Arnica is the flower extract of Arnica Montana an herb with almost legendary healing powers. It is especially suited to all types of injuries to the skin including injuries, contusions, falls, blows and bruises. It also helps with itching, burning, eruption of small pimples and bed sores.

Berberis Vulgaris has been found useful in itching, burning skin. It also aids with small sores, eczema and small pustules.

Calendula is a most remarkable herb when applied to cuts, scratches and other superficial injuries. It promotes healthy granulation and rapid healing.

Salicylicum Acidum promotes healing of itching and burning skin. Helps heal sores and small pustules.

Alpha Lipoic Acid is an antioxidant. It helps the body use Vitamin C as ascorbic acid in collagen synthesis. It also works with pantothenic acid in the synthesis of skin amino acids and other skin components. Collagen, the major protein in skin and joints, keeps the skin tight and supple and the joints healthy.

MSM is rapidly absorbed through the skin to nourish connective tissue.

Polyphenols are catechins derived from green tea extracts. Catechins trap free radicals that damage the skin up to three times better than Vitamin C. Catechins also retard the growth of harmful bacteria in the skin.

Trona has been used by ancient civilizations from the beginning of time to balance pH and promote healing in the body.

Zinc and copper Peptides increase the dermal levels of collagen, elastin, and the water-holding proteoglycans and glycosaminoglycans, reversing skin aging.

Active Ingredients:
Aesculus Hipp 4x, Aloe Vera 4x, Arnica 4x, Berberis Vulgaris 4x, Calendula 4x, Cuprum 4x, Salicylicum Acidum 2x, Zincum 3x.
MBi Nutraceuticals’ Sunburn Skin Spray is a blend of nutrients crucial to optimum skin health combined in a creamy lotion. It is quick absorbing and helps lock moisture into the skin while nourishing it, without leaving a greasy residue behind. It is a rejuvenating moisture treatment for the entire body.

Processing
Our on-site laboratory constantly monitors and tests products to ensure consistent quality of raw materials, product batches, and finished products. Analyses are conducted to validate content and specifications, assuring high quality.

Manufacturing Standards
MBi Nutraceuticals operates its own manufacturing facility. Our standard operating procedures are based on “Current Good Manufacturing Practices”. MBi ensures the highest quality nutraceuticals by applying our manufacturing procedures to every nutritional, herbal, food, homeopathic, and personal care product we make.
